COOLNODE

Whitepaper
By coolnodev

- ▶ Wellcome to coolnode
I thought something new could come

I've seen everyone
bother about
investing. I thought I
would simplify this.

After many improvements, I realized why we should not do something to bring investment platforms into one place. So you've got the unified platform you can find in one!

Own coin investment. We're tied up with one's own exchange site. Here you will find more masternode based coins. We look at these coins before listing and make sure they are a good investment. This maximizes the expected profit and reduces the risk for everyone.

- ▶ Wellcome to coolnode
I thought something new could come

We are negotiating with several **masternode-supported** coins.

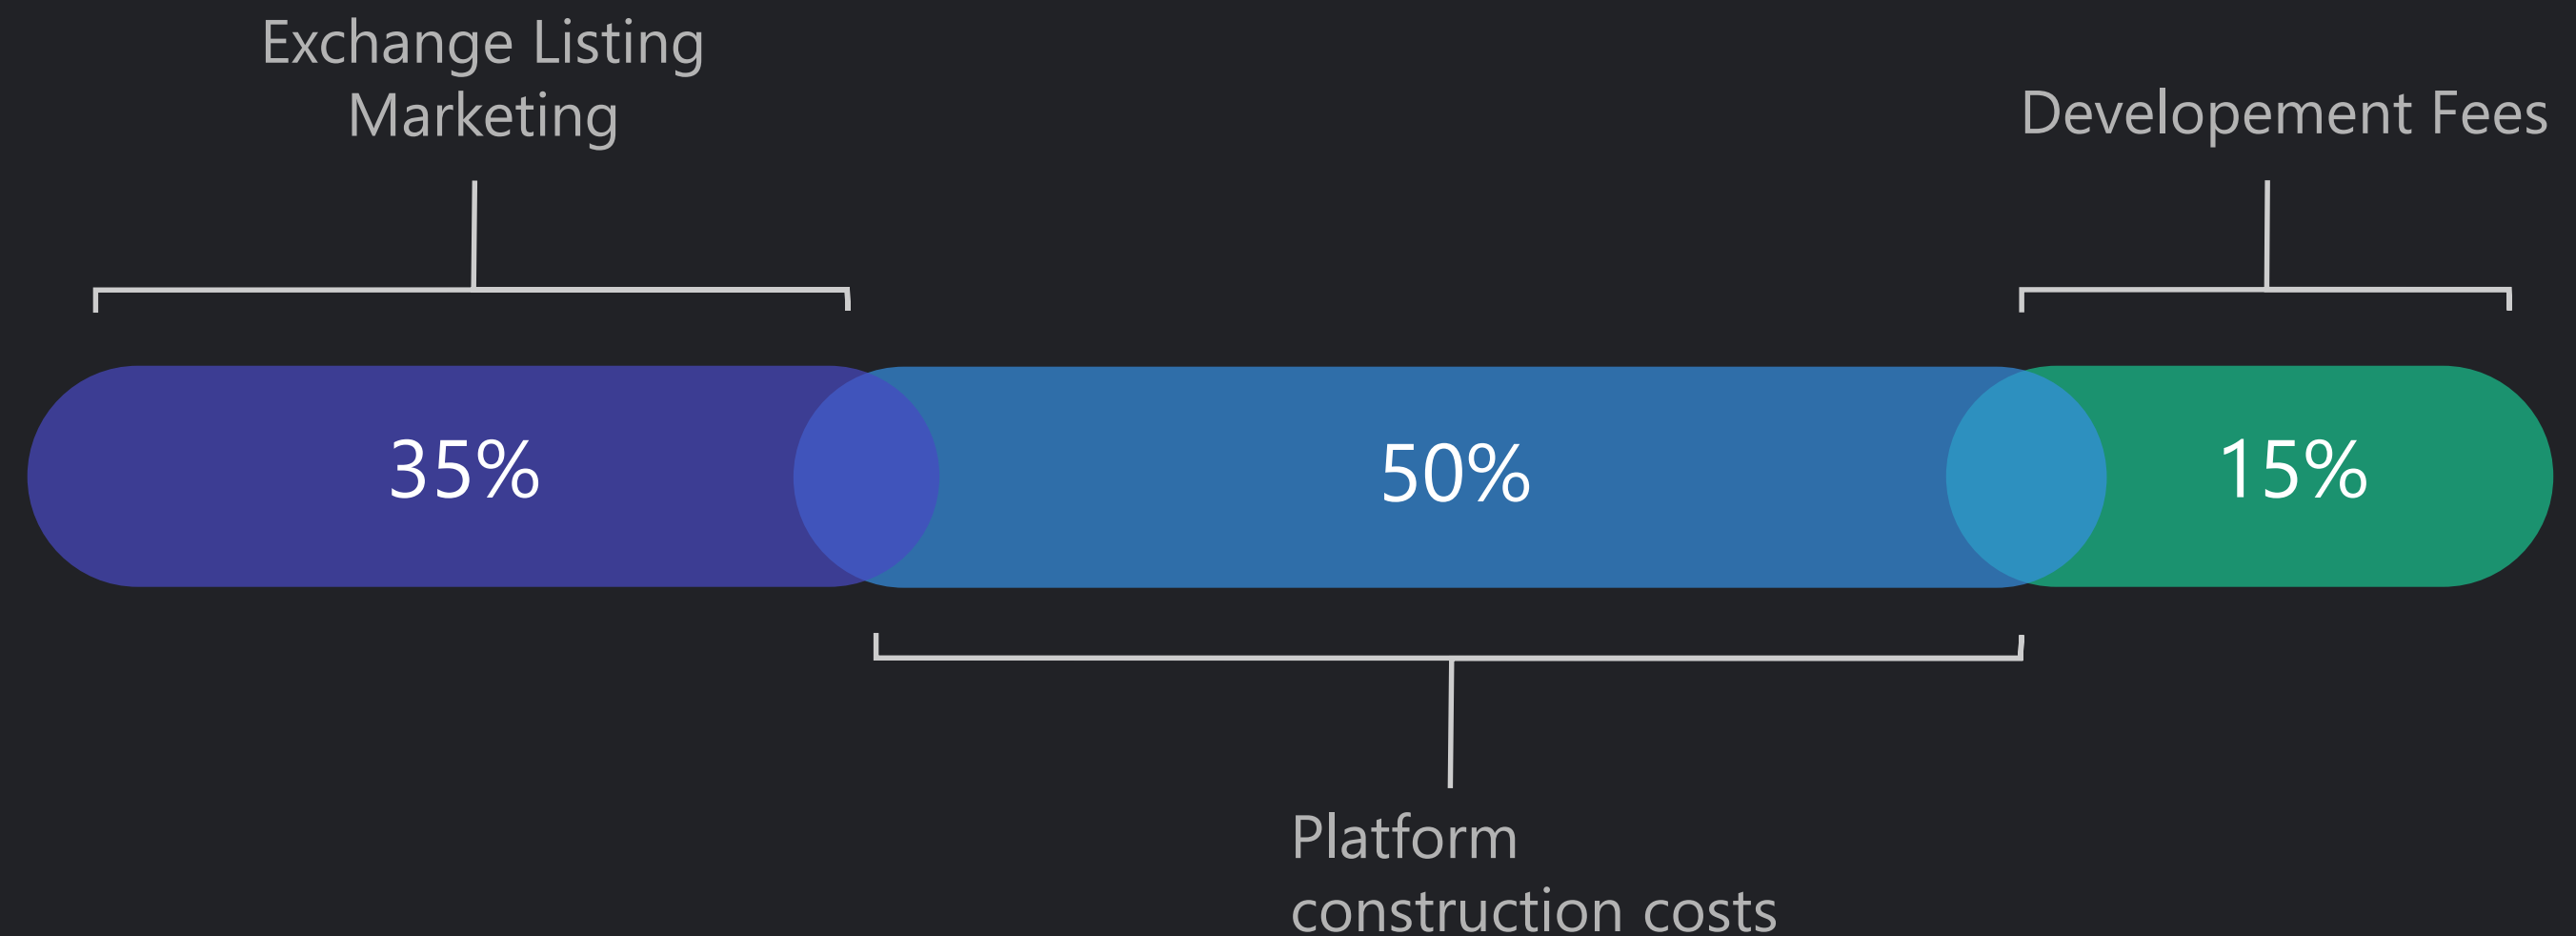

Our commitment reflects that we want to hit the top! We will try to find all major Masternode communities by joining us, thus increasing the usability of our platform, of course, all of this free of charge. Our goal is to facilitate the work of as many users as possible. In the first quarter we look for the 10 largest masternode coins. Of course, new smaller projects can join as well! Our own coin(CoolNode) helps to build the platform and provides cover for the developments.

▶ Business Landscape

We Deliver Dream

We present you the use of premined COOL coin.

Use of the amounts collected is illustrated in the following diagram. Everything is dedicated to the development and promotion of the platform. In the first round, we want to reach more exchange sites besides my own so that new users will be easier to access.

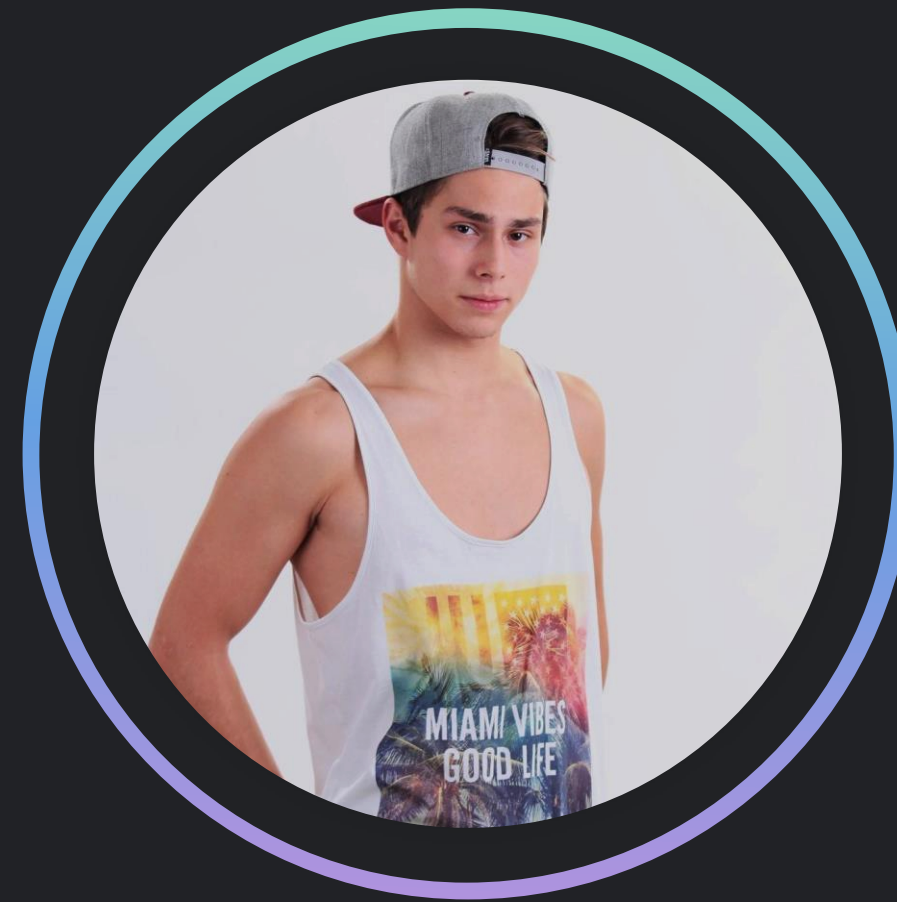

▶ Meet The Team

Steve Gyori

CEO

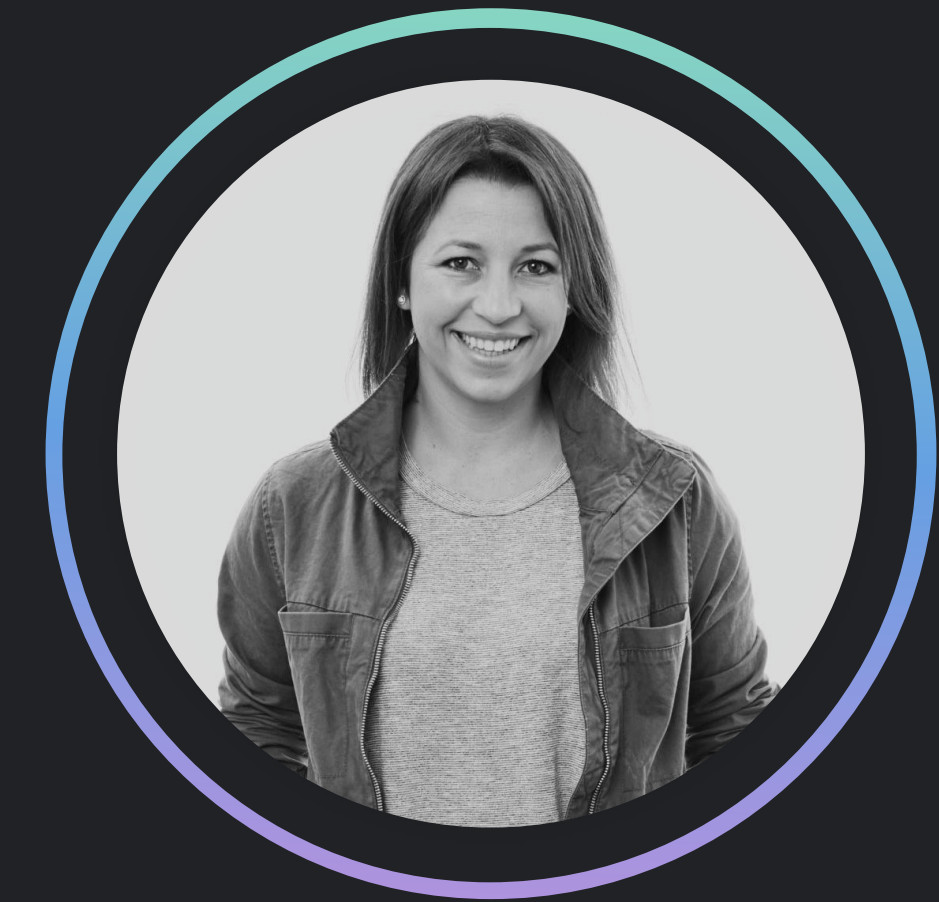

The loads of the platform are pulled on his shoulders
Financial Support for
Developments

Ben Baker

DEVELOPER

He is the head of development work. There is a lot of innovation coming from it. He has young, but very professional knowledge

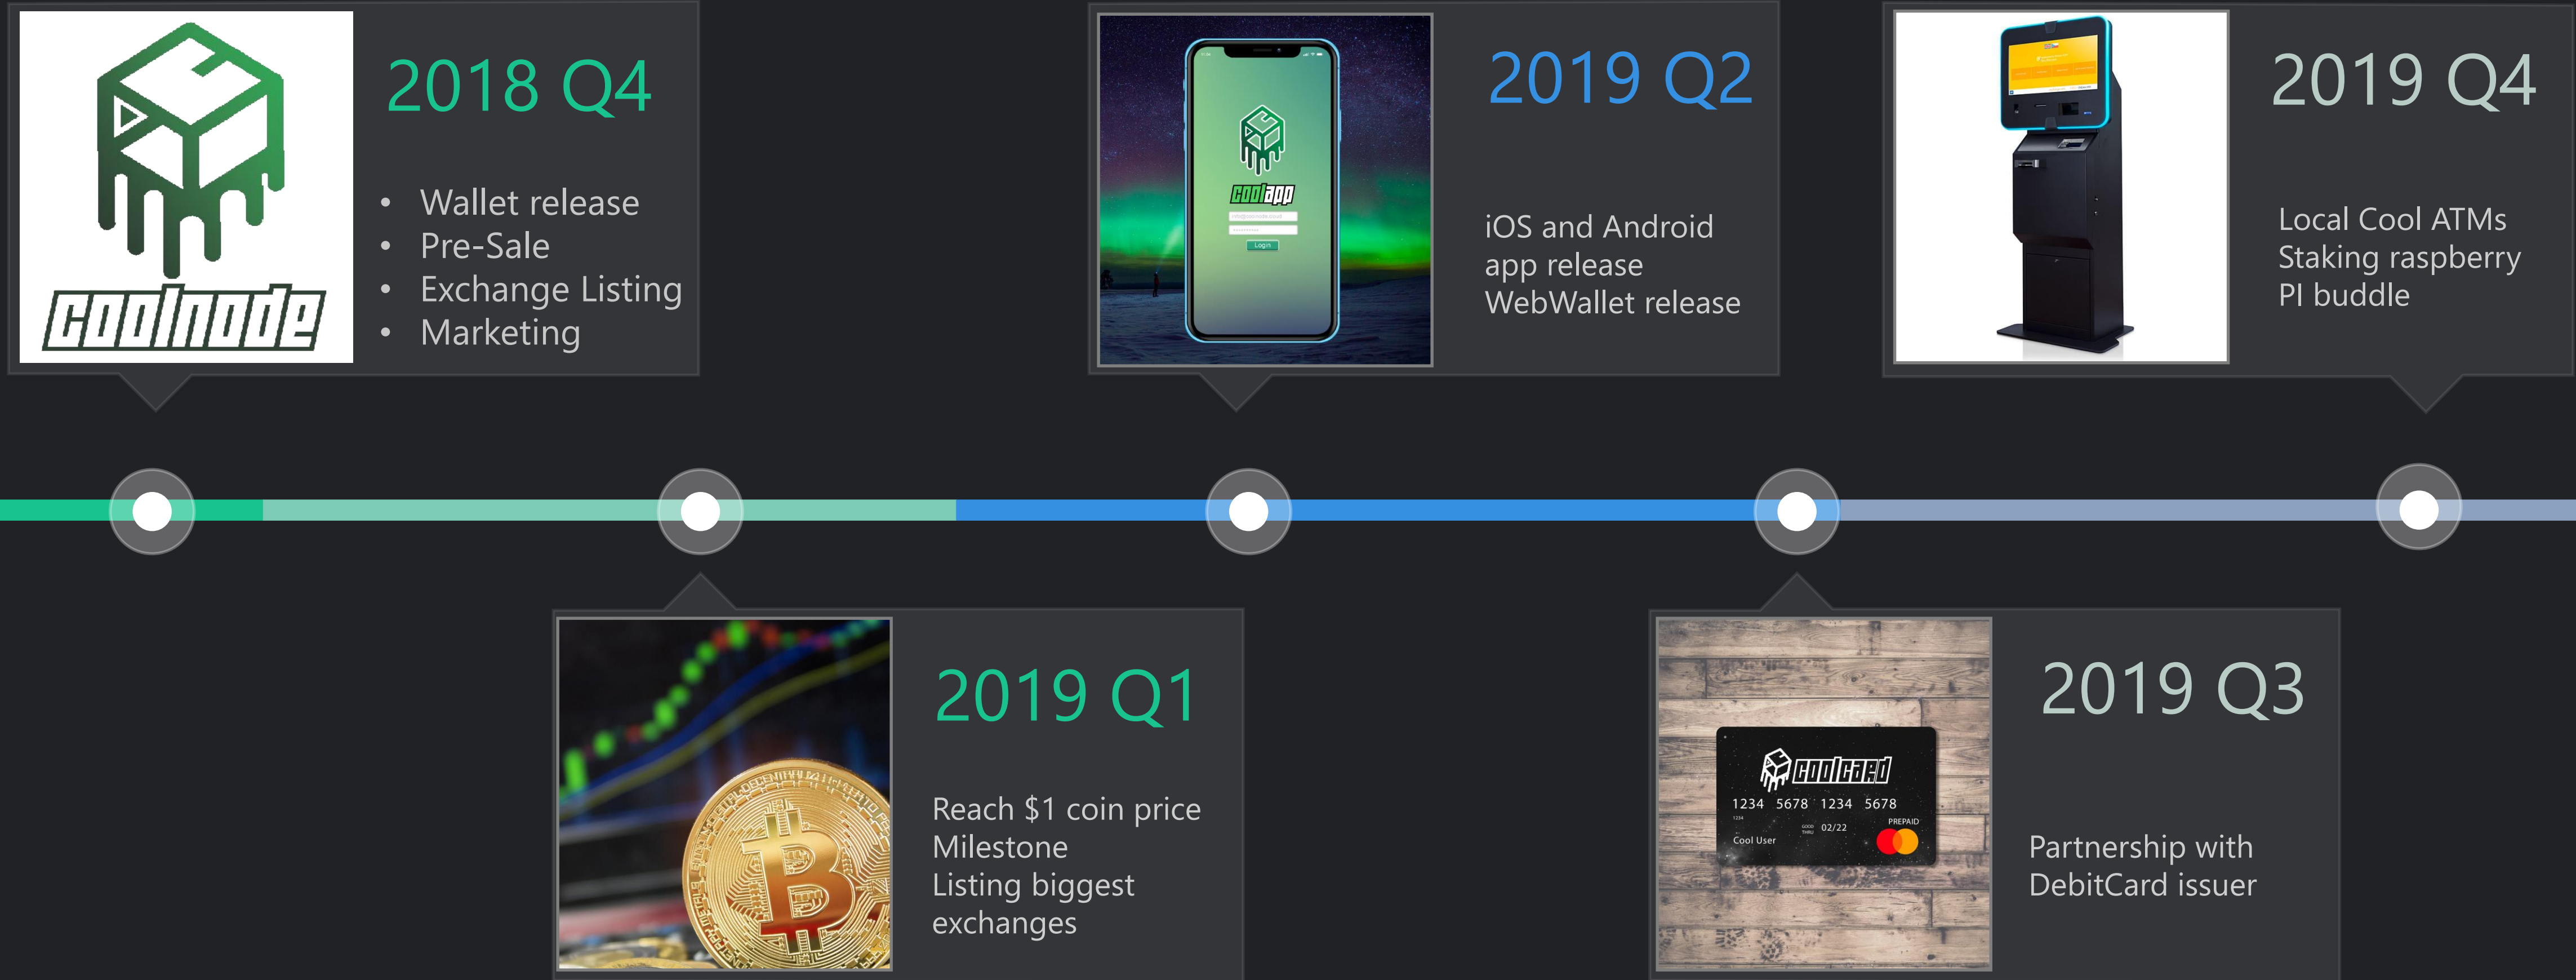

Anna Feder

Marketing Manager

It is responsible for all things related to advertising and expansion of the platform by other platforms

▶ Timeline

We Deliver Dream

CoolNode Specification

Look behind the technology

Here you can see what technology is based on our own coin. These are due to the low transaction time and high return on investment

Specification Table

Coin Ticker	COOL
Total Suply	300 000 000
ALGO	QUARK
MN Collateral	5000 COOL
Block Time	60 sec
Staking age	Min 2 Hours
MN Rewards	75%
POS Rewards	25%
